UNIMIB International Mobility Programmes

Erasmus Study

Erasmus
Traineeship

Double degree
(EU countries)

Exchange
projects (Extra-
EU countries)

Double degree
(Extra-EU
countries)

Programmes' main characteristics and goals

- ✓ Mobility programmes are meant to acquire credits (ECTS) to be counted towards a qualification during a study/traineeship experience abroad
- ✓ A mobility experience will enrich your curriculum vitae
- ✓ A well planned mobility will allow you to graduate within the normal duration of the course of study («in corso»)

Recognition of credits

All the successful exams, the research activities, the preparation of thesis and the internship, previously approved by the Mobility Coordinators, will have full recognition, provided the ECTS acquired do not exceed the curricular study plan.

Only whole didactic activities can be included in the Learning Agreement (LA)/ Learning Agreement for Traineeship (LAT) / Learning Agreement for Extra-EU mobilitites (LAEX). No integration can be requested to activities carried out in mobility and partial recognition of educational activities (“modules”) is not allowed.

In the case of research/training activities for the final exam: the student will have the recognition of all the credits related to the final exam, minus one; the remaining credit will be uploaded after dissertation

Mobility programmes are **NOT** meant to...

❌ Learn a foreign language!

(a mobility experience requires a good degree of fluency as a pre-requisite)

❌ Avoid UniMiB's most difficult examinations!

(the mobility project should be well balanced and coherent with the curriculum)

❌ Visit a city / country !

(the choice of the destination will take into account primarily the didactic / training opportunities, not the tourist attractions)

Pre-requisites to apply

- ❑ Students must be enrolled full-time within the normal duration of the course of study («in corso») to a Degree Course, Master's Degree or Single-cycle Master's Degree, to a School of Specialization or to a PhD. Part-time students and students with a suspended or interrupted career cannot be admitted;
- ❑ Students cannot benefit from other grants funded by the European Union for the same period of time (e.g. Marie Skłodowska Curie grant, EIT Raw Materials funds, etc.).

The above requirements have effect from the application to the end of the mobility programme

Traditional vs «blended» mobility

A mobility programme can be conducted as:

Traditional mobility (the whole study or traineeship period is spent abroad, with the authorization of the host Institution, in person or in e-learning mode / remote working);

or

Blended Learning (the study or traineeship period is a combination of physical mobility abroad and remote learning / working from Italy)

..... depending on the organization of the host Institution (availability of remote didactics / internship programmes.
