

BAMBINI BICOCCA srl

SPIN OFF DELL'UNIVERSITÀ DEGLI STUDI DI MILANO-BICOCCA

BAMBINIBICOCCA.IT

PRESENTATION

Bambini Bicocca S.r.l., innovative start up with a social mission, a spin-off of the University of Milano-Bicocca, is focused on research and the dissemination of experimentation in early childhood education.

It stems from the experience of the Bambini Bicocca Infant-toddler center (2005) and preschool (2017) and is based on research promoted by the experimental Zero-to-Six Hub promoted by the University of Milano-Bicocca.

The Company's purpose is research and development in education and training through the development of innovative educational services and preschools for children aged 0 to 6 years, with the aim of developing, validating and making available the knowledge gained, pedagogical and management models, devices and technological products, training and documentation within a STEAM perspective, with particular attention to inclusion and lifelong learning.

PRODUCTS & SERVICES

Bambini Bicocca S.r.l. creates high-tech products in the areas of didactics, professional training, educational design and documentation.

It develops, tests and markets products for educational robotics, technologies for inclusion and for language and music learning, multimedia tools for educational design and documentation.

The company offers feasibility plans, consulting on innovative services, management models, corporate welfare, coaching, supervision and training in the field of early childhood educational services (children aged 0-6).
