

# REGISTRI DIGITALI S.R.L.

SPIN OFF ACCREDITATA DALL'UNIVERSITÀ DEGLI STUDI DI MILANO-BICOCCA

[www.registridigitali.it](http://www.registridigitali.it)

## PRESENTATION

Registri Digitali S.r.l., established on 8 September 2021 in Milan, is based on an entrepreneurial project aimed at developing IT solutions based on the use of Blockchain and Artificial Intelligence, applied to industrial production processes and the corresponding products and services.

More specifically, the company draws its origins from the skills acquired in the field of Cryptography and the implementation of cryptographic systems, as well as from the studies on Blockchains and Smart contracts performed by Prof. Alberto Leporati at the Department of Informatics, Systems and Communication (DISCo) of the University of Milan-Bicocca.

## PRODUCTS & SERVICES

- **Blockchain:** Design and implementation of IT solutions based on permissioned Blockchains, for the certification and notarization of documents and information deriving from industrial processes, supply chains, etc.;
- **Artificial Intelligence:** Application of AI algorithms and techniques (machine learning, deep learning, deductive reasoning, ...) for the analysis and management of large amounts of data (Big Data) deriving from industrial manufacturing processes and IoT devices.

### Team

Alberto Leporati

Albino Lenardon

Alessandro Lenardon

Giuseppe Mazzei

Nicola Sansevero

Alex Marchesi

### Support

Self-financed

### Sector

INFORMATICS, ELECTRONICS  
and COMMUNICATION SYSTEMS

### Contact

Liliana Rispoli
