UNIVERSITÀ
DEGLI STUDI DI MILANO-BICOCCA

WiFi Settings for MAC OS

Area Sistemi Informativi

These notes apply to clients running the **Apple Mac** operating system.

It is assumed that users are familiar with the Wi-Fi setup of their mobile devices.

Access to the university wireless network from Apple Mac requires a wireless card/adapter with 802.11 b/g/n/ac support, making sure that an up-to-date driver is installed.

Available SSIDs are *unimib*, *eduroam*, *UnimibGuest*.

When prompted for credentials, you should enter your **unimib email address and password**. If connecting to *eduroam* you should use the credentials obtained from your own organization.
