CURRENT RESEARCH INTERESTS

My research interests currently focus on four main topics: migration, family, social exclusion and population dynamics. I am particularly interested in spatial aspects, therefore as regards migration, I investigate on spatial distribution of immigrants, both at the micro and at the macro level, and on their impact on the hosting population. As regards family, I work on differences in family formation and dissolution processes among the European countries, centring on the peculiarities of the Italian society. Social exclusion includes a very deep spatial feature, as it depends on the social environments in which people lives: I mainly studied the subject at a local level, but I am currently involved in a wider project on the European cities.

PREVIOUS JOB DESCRIPTION

During the work period by the Statistics Sector of Lombardy Region I was responsible for data collections and information release (in cooperation with the Italian national Institute for Statistics - ISTAT) for the demographic area. The job was finalized to produce, among other things, regional survival tables, cohort fertility tables, and population projections at the municipality level (results published in vols. 99-104, 116 and 120 of Collana di Documentazione Statistica – Regione Lombardia).

I was also in charge of the management of the election statistics through the analysis and the publication of regional, national, and European elections votes (vols. 101, 106, 114, 118 e 119 of Collana di Documentazione Statistica – Regione Lombardia).

Among the activities in support of regional government policies, I was appointed to cooperate with the Epidemiological Service of the Health Sector (Mortality Atlas of Lombardy 1989-1994, published by the Health Sector of Lombardy Region), and with the Transports Sector (Public Opinion Survey on Transports and Viability in Lombardy, vol. 109 of Collana di Documentazione Statistica – Regione Lombardia).

Furthermore, I participated to the project preliminary development of the regional policies "School Voucher" and "Home Voucher".

Finally, I contributed to plan and implement the recurrent Public Opinion Surveys by Lombardy Region.

I was officially in charge of representing the Lombardy Region in the CISIS (Interregional Centre for the Information System and the Statistic System) Working Groups "Demography" and "Population Census". The groups produced critical analyses of the methodologies adopted by the Region Governments with reference to population projections and foreign population estimates (in order to detect inequalities in the Health provision repartition) that have been

published in Quaderni CISIS (2000) "Demographic projections" and (2001) "Foreign population in Italy".

RESEARCH PROJECTS

I participated to the working group (coordinated by G.C. Blangiardo) that produced the biennial Report to the Parliament on the elderly conditions 2002-2003. The report has been published in 2004 by Ministry of Welfare.

I participated to the research project "Outcomes of regularizations in the southern regions and geographical and occupational mobility of workers regularized", committed in 2005 to a consortium of research institutions by Ministry of Welfare.

I participated to the research project "Prevalence of poverty among immigrants in Lombardy", in the works of the Social Exclusion Committee of Ministry of Social Solidarity in 2005.

I participated to the research project CeSDES- Centre of Demographic and Social Studies "Lombardy: population projections 2008-2030", with G.C. Blangiardo and E. Barbiano di Belgiojoso (Report CesDES, 2009).

During 2014, research project "Insieme per la sicurezza", committed by ConfCommercio-Milano, with G.C. Blangiardo, L. Terzera and S. Mirabelli. The Report is downloadable here http://www.unionemilano.it/it/impresa_istituzioni/citta_metropolitana/indagine_sicurezza/.
