IMPROVE THE MANAGEMENT OF SEVERE NEUROLOGICAL EMERGENCIES IN INTENSIVE CARE

PROGRAM DESCRIPTION

The goal of this **clinically-oriented week** is to provide intellectual interaction with leading experts, to gather the essential information needed to treat neurological/neurosurgical patients, including traumatic brain injury, subarachnoid hemorrhage and intracranial hemorrhage.

The school target audience includes staff doctors/residents working in ICUs, as well as neurosurgeons and neurologists.

“NeuroIntensive Care: Update 2020”, is the **fourth edition** of a successful course held aimed in fostering a collaborative, multidisciplinary approach.

The School provides a consistent set of **basic knowledge, updated treatment strategies, clinical scenarios**, including hands-on simulations, to be used during patient management.

In a week period, the participants will be intensively exposed to lectures on topics ranging from basic concepts to monitoring systems and treatment strategies in traumatic and non-traumatic neuroemergencies.

The practical part will cover neuroradiology interpretation, the neuromonitoring at the bedside (EEG), and hands-on transcranial Doppler and cerebral echography.

COURSE DIRECTOR

Prof. Giuseppe Citerio, UniMiB - Italy

STAFF

Dr. Carolina Iaquaniello, UniMiB
Dr. Alessandra Ionescu, Policlinico Gemelli
Alessia Vargiolu, UniMiB

HANDS-ON TRAINERS

Dr. Maurizio Saini, ASST-MONZA, Ospedale di Desio
