

# FEM2 – AMBIENTE s.r.l.

SPIN OFF ACCREDITATA DALL'UNIVERSITÀ DEGLI STUDI DI MILANO-BICOCCA

[www.fem2ambiente.com](http://www.fem2ambiente.com)

## PRESENTATION

Fem2-Ambiente was founded in 2010 as a “*University of Milano-Bicocca spin-out company*” and it mainly operates an R&D hub in biotechnology. The company offers innovative services and products in diverse sectors with special consideration for environmental issues.

Fem2-Ambiente also develops research projects with partners from academia and the private sector. It also deals with educational activities at both national and international level.

In 2014 FEM2-Ambiente signed a special agreement with other 4 companies, creating a network that supplies the market with an innovative and complete range of services, from lab tests to graphics, from formulation to marketing ([www.innovationet.it](http://www.innovationet.it)).

## PRODUCTS & SERVICES

The first product developed was Immediatest-Acqua (an Italian patent owned by the University of Milano Bicocca, FEM2 is the licensee of the patent), a simple and reliable DIY test to analyze tap water. Four different versions of the test are now available:

Immediatest-Acqua single test;

Immediatest-Acqua two tests (allowing testing on 2 sources);

Immediatest-Acqua education (for schools, environment centers);

Immediatest-Acqua Casa (to assess water washing potential, water aggressiveness and chlorine content).

FEM2-Ambiente also performs professional analysis of water, both chemical and microbiological, for private customers and companies. FEM2-Ambiente also offers sophisticated services for the food and nutraceutical industry, in particular it is recognized as an international center for DNA Barcoding.

FEM2-Ambiente is the Italian leader in avian diagnostics services and provides two kind of services based on DNA testing: bird sex identification and diseases molecular diagnostics.

Since 2011 the company has been developing an interest in e-cig, seen as a useful tool to protect the environment. The company has also widened its sphere of activity providing specialist services for e-liquids producers.
