PRESENTATION

REVIEWERCREDITS S.r.l. is an independent platform dedicated to scientists, journals and publishers **addressing the peer review process**.

Peer review ensures research is original and scientifically relevant, helping to sustain accurate information. The considerable growth in submissions has made it increasingly difficult to find reviewers, impacting overall performance and the availability of new research.

REVIEWERCREDITS S.r.l. was created to ensure reviewers receive **appropriate recognition and certification for their activity**, aiming to enhance visibility so that it can be added to their curricula and become instrumental in career advancement. Reviewers also earn **virtual credits** to be used against selected services.

REVIEWERCREDITS S.r.l. and its virtual store is the only tool available today to reward reviewer for their contribution.
